PROFESSIONAL SUMMARY

Data Science graduate student focused on data analytics, business intelligence, and AI-enabled data systems. Works with SQL, Python, Power BI, PostgreSQL, and dbt to build analytical workflows, dashboards, and governance-focused data projects, turning raw data into trusted reporting layers, clear KPIs, and actionable insights for business decision-making. Contributed four merged PRs to Microsoft's Agent Governance Toolkit and was invited as an early contributor to the A2A Trust Ecosystem, peer-reviewed open-source credentials in data quality and governance. Authorized to work in the U.S.

TECHNICAL SKILLS

Data Analysis & BI: SQL (Window Functions, CTEs, Query Optimization), Python (Pandas, NumPy, Scikit-learn), Power BI (Dashboards, DAX, Semantic Models), Tableau, Excel (Pivot Tables, Advanced Formulas), Data Storytelling

Data Engineering & Governance: dbt, ETL/ELT Pipelines, PostgreSQL, MySQL, BigQuery, DuckDB, Data Validation, Data Governance Standards, Metadata Management, Cross-Source Reconciliation

Applied AI & Agent Systems: Microsoft AGT (Policy Enforcement), A2A Trust Ecosystem, AI Agent Workflows, FastAPI, Responsible AI

Programming & Tools: APIs, JSON, SQLAlchemy, Git, Docker, GCP, Microsoft Fabric

Process & Delivery: Requirements Gathering, Agile / Scrum, Jira, Confluence, Technical Documentation, Stakeholder Communication

WORK EXPERIENCE

Junior Data Analyst — IVS Software Solutions

Jun 2023 – Sep 2024

Pune, India

- Analyzed and reported on 80K–150K operational records per cycle using SQL and Python, delivering standard and ad-hoc insights for 3 internal business teams.
- Conducted structured exploratory data analysis (EDA), uncovering systematic data quality gaps and improving downstream reporting accuracy by 30%.
- Re-engineered SQL pipelines with optimized join logic and incremental loads, cutting data preparation time by 40%.
- Built reusable, documented datasets and dashboards adopted across weekly and monthly stakeholder reviews, eliminating 4–6 hours of manual work per cycle.

PROJECTS

MetricTrust Control Plane | Python, FastAPI, dbt, DuckDB, SQLAlchemy, RS256 JWTs

- Built and deployed an evidence-bound execution control plane for autonomous analytics agents that evaluates fresh dbt data-quality evidence through deterministic policies, routes higher-risk actions for human approval, issues cryptographically signed single-use permits, rejects replay and tampering attempts, and automatically rolls back actions after guardrail breaches; validated through 21 passing tests and an end-to-end decision-trail demo.

AI Data Governance & Quality Monitoring System | PostgreSQL, Python, Power BI

- Engineered a governance platform processing 150K+ daily events: metadata documentation, data classification, schema validation, and cross-source reconciliation for 90% of sources; built Power BI dashboards with DAX KPIs and data lineage tracking, cutting incident response time by 25%.

Decision Intelligence Experimentation Platform | PostgreSQL, Python, dbt, Streamlit

- Architected an end-to-end A/B testing and decision-support platform simulating 50K+ users and 280K+ events, hypothesis testing pipelines, go/no-go launch framework, dbt metrics layer, and self-serve dashboard reducing analyst involvement by ~60%.

ADDITIONAL EXPERIENCE

Microsoft Agent Governance Toolkit (AGT) | Open-Source Contributor

- Merged PRs: adopter documentation, tutorial verification, a data-quality-aware governance pattern, and a dbt-backed DataQualityEvidence adapter, establishing naming conventions and repeatable governance workflows.

A2A Trust Ecosystem | Invited Early Contributor

- Contributed a data-quality trust-signal scheme and enterprise governance/production-readiness checklist for multi-agent deployments; invited based on AGT work; PR merged and governance proposal published in the A2A project.

EDUCATION

Masters in Data Science | The University of Texas at Arlington, TX | GPA: 3.8

Jan 2025 – Dec 2026

Bachelor of Engineering in Artificial Intelligence and Machine Learning | SPPU, India | GPA: 8.2

Aug 2020 – May 2024
