SUMMARY

Data Science Master's student specializing in **SQL-based analytics, KPI development, and business intelligence dashboards**. Applied Python (Pandas, NumPy) and SQL to process large operational datasets, perform exploratory data analysis (EDA), and build **analysis-ready data models for reporting and forecasting**. Built automated dashboards and analytical pipelines that **reduce manual reporting and highlight key business trends and performance drivers**.

EDUCATION

Master of Science in Data Science

Jan 2025 – Dec 2026

The University of Texas at Arlington TX | **GPA: 3.8**

Relevant Coursework: Data Mining, Neural Network and Deep Learning, Convex Optimization, Cloud Computing and Big Data, Database Systems, Introduction to Probability and Statistics

Bachelor of Engineering in Artificial Intelligence and Machine Learning

Aug 2020 – May 2024

Savitribai Phule Pune University, India | **GPA: 8.2**

Relevant Coursework: Artificial Intelligence, Machine Learning, Natural Language Processing, Database Management Systems, Big Data Analytics, Operating Systems

TECHNICAL SKILLS

Programming: Python, SQL, R

Databases & Data Warehousing: PostgreSQL, MySQL, BigQuery

SQL & Data Manipulation: Joins, Aggregations, Window Functions, Query Optimization

Data Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Validation

Statistical Analysis: Hypothesis Testing, A/B Testing, Descriptive Statistics

Data Visualization & BI: Power BI, Tableau, Excel, Dashboard Development, KPI Reporting, Data Storytelling

Data Engineering: ETL Pipelines, Data Transformation, Data Preparation, Data Modeling

Machine Learning: Scikit-learn, XGBoost, Random Forest, K-Means, Feature Engineering

Cloud Platforms: Google Cloud Platform

Tools: Git, Docker, Salesforce (CRM)

WORK EXPERIENCE

Junior Data Analyst

Jun 2023 – Sep 2024

IVS Software Solutions – Pune, India

- Processed and transformed **80K–150K** record operational datasets using **Python (Pandas, NumPy) and SQL** to create analysis-ready data for analytics and reporting.
- Conducted **exploratory data analysis (EDA)** across multi-variable datasets to **identify trends, anomalies, and data quality issues, reducing data processing time by 30%**.
- Wrote and optimized **complex SQL queries (joins, aggregations, filtering)** into streamlined query pipelines, reducing data preparation time by 40%.
- Developed **internal dashboards using Streamlit, Matplotlib, and Plotly** to monitor data distributions, anomaly patterns, and operational performance metrics.
- **Collaborated** with developers to ensure cleaned datasets were **compatible with machine learning pipelines** used for experimentation.

PROJECTS

SQL Retail Analytics & Inventory Optimization Dashboard | SQL, Python, Streamlit, Plotly

Jan 2026

- Architected a data pipeline to process and transform **541K+ retail transactions** into analysis-ready datasets using **SQL and Python**.
- Engineered SQL aggregations and indexing strategies, **reducing dashboard load times by 40%** for large operational datasets, ensuring scalability for large-scale operational datasets.
- Implemented **ABC inventory analysis** identifying the top 20% of products generating **75% of revenue** to support procurement decisions.
- Built an automated **Streamlit and Plotly** dashboard replacing spreadsheet workflows, saving stakeholders **3–4 hours weekly**.

Customer Churn Prediction with SHAP Explainability | Python, Scikit-learn, XGBoost, SHAP

Dec 2025

- Developed an **end-to-end churn prediction pipeline** using XGBoost on **7,043 customers and 21 features** achieving **ROC-AUC 0.84** and **F1-score 0.66**.
- Engineered predictive features and applied **resampling techniques** to address class imbalance improving recall by **18% improvement in model recall** for high-risk segments.
- Applied **SHAP explainability** to interpret model behavior and identify key churn drivers influencing customer retention.
